The Ainslie is a 3 bedroom design which lends itself to different section shapes. The garage door can also be moved onto the side for different access options. A large kitchen/dining area and two lounge/seating areas make ample space for family living. The Master bedroom contains an ensuite and WIR, and two other double bedrooms contain built in wardrobes. One of the bedrooms is ideally located to function as an office if required. A laundry with direct access outside provides more bench space and storage, along with a large cupboard accessed from the hallway. The family bathroom and separate toilet complete the layout.
