The Kingston is a modern compact 3 bedroom house design. The split roof line gives great street appeal, with a defining front entrance next to the single garage. From here it leads past 2 generous double bedrooms, which are close to a large main bathroom. The hallway leads you through the house and opens up into the combined kitchen, dining and living area. Through the kitchen is the doorway to the sizable laundry with good storage and external access. Further round to the right is the lounge along with a wood burner. The dining area with large external slider doors means that you can easily access the outdoor living space. The entrance to the master bedroom suite is off the dining room, and is equipped with a spacious ensuite and WIR.
